

Greetings everyone,

By this letter, I submit my second candidacy for the formation committee of ASSÉ. I began my involvement in the student movement in AÉCS (Cégep of Sherbrooke) during fall 2012 where I occupied diverse responsibilities, notably as responsible for external affairs and represent to the Commission of college studies. I will also pursue my college course in organic farming techniques at the Cégep of Victoriaville next year.

I keep similar motivations to involve in the national team than the previous year. Firstly, it appears important to my eyes that the regional activist base invest ASSÉ's structures, and this, for the sake of representation and belonging. Secondly, the formation committee's democratization function of the practices and militant culture concord with the role I would like to play in the organization.

In that sense, I also retain the project to build a formative bank and trainers for the next school year, and this, to facilitate access to various workshops on local campus, which will complement the traditional formation camps. I am confident of being able to translate adequately in actions the orientation that will take the congress.

Do not forget what brings us together, otherwise it will be necessary to learn it again.

Cordially,

*Charles Besner*
